

PDM 3.0 and Interoperability

PDM 3.0 provides interoperability that is unmatched in construction today. PDM 3.0 works seamlessly with the McGraw Hill Construction Network - Dodge to provide users with a solution that improves construction efficiencies. PDM provides interoperability at all levels of the project that no other solution can match. The PDM 3.0 suite of products provide users with the ability to improve information exchange across all projects.

McGraw Hill Construction Network - Dodge

Firms that subscribe the McGraw Hill Construction Network Dodge will be able sync projects, including plans and specs, directly into any PDM 3.0 system. If your firm is looking to expand into a new territory, the combination of PDM 3.0 and the McGraw Hill Construction Network - Dodge automate the process of finding and getting work.

McGraw Hill Construction Global Contact Directory

Locate contractors from across the nation. PDM 3.0 and its direct integration with the McGraw Hill Construction Network - Dodge Global Directory will help you find and add contacts seamlessly to a PDM 3.0 system. PDM 3.0's integrated prequalification process then helps you assure the subs you find are capable.

McGraw Hill Construction Network - Sweets

PDM 3.0's powerful integration with the Sweets Network dramatically improves the electronic submittal process. Submittals managed with PDM 3.0 can be directly linked to the actual product manufacturers documents housed in the Sweets Network. This provides simple access for subs to get electronic documents for submitting to a project.

Digital Takeoff and Estimating

PDM 3.0's direct integration with leading digital estimating tools such as On Center's On Screen Takeoff make it a powerful tool for preconstruction teams. The digital estimating integration allows electronic documents contained in any PDM 3.0 system to be directly transferred into the estimating solution. This provides a seamless transfer of data that improves efficiencies.

Project Management Solutions

PDM 3.0 integrates with the leading project management solutions including Prolog and Expedition. This integration forms a powerful solution that adds prequalification and other functions for companies that have already invested in these solutions.

ReproMAX Distribution Network

PDM 3.0's integration to the ReproMAX Network with over 150 locations in the US, Canada, UK, and Europe make getting printed plans into the hands of stake holders the same day a reality. Contact your local ReproMAX member for more information on how the ReproMAX Network can get your prints there today not tomorrow.
