

# PDM Pro 3.0

PDM Pro 3.0 is a solution specifically designed to improve information gathering and sharing for construction. It is the ideal solution for users who need more powerful tools to capture, organize and distribute construction information throughout the entire project lifecycle. PDM Pro 3.0 streamlines many of the difficult and fragmented tasks to improve information exchange across the entire construction project.

## Prequalification and Contact Management

Reduce your risk and contractor defaults by implementing PDM's integrated sub contractor prequalification program. End the days of manually entering emailed or faxed in subcontractor information forms. Subs login to the easy to use website and submit their company information online. Once the subcontractor completes the online process, users will be able to easily review, approve, and search the capabilities of each subcontractor in your private database.

## Contractor Evaluations

Improve your ability to privately manage subcontractors performance on projects. PDM 3.0's unique evaluation process will track individual contractors performance based on each project as well as all projects. PDM Pro 3.0 will help companies effectively manage and share contractor evaluation information consistently across the entire organization.

## Project Closeout

Organizing and Managing documents that are vital to project closeout throughout the project electronically all but eliminates lengthy closeout periods. PDM Pro 3.0 Provides a searchable closeout database that includes all project closeout information. PDM Pro significantly shortens the time it takes to closeout projects.

## Invitation to Bid and Bid Management

PDM 3.0's unique system allows users to set up your bid packages, invite bidders, and monitor each bidders intentions. Bidders will then have a centralized place to view, download, sync, and order printed documents by using the branded PDM Pro 3.0 web portal. Reduce printing and CD distribution costs with PDM Pro 3.0's powerful bid management system designed to streamline the bid process.

## Submittal Management

Submit, share, review, and manage an electronic submittal process using PDM Pro 3.0's process designed specifically for construction. All PDM components work together to provide a seamless electronic submittal process. Managing and cataloging submittals electronically allows users to use PDM Closeout to shorten project completion.

## ReproMAX Distribution Network

PDM 3.0's integration to the ReproMAX Network with over 150 locations in the US, Canada, UK, and Europe make getting printed plans into the hands of stake holders the same day a reality. Contact your local ReproMAX member for more information on how the ReproMAX Network can get your prints there today and not tomorrow.

**For more information or a live demo showing how PDM 3.0 can help your firm improve operations contact your local certified ReproMAX member.**
