Join Your Construction Industry Peers...

A number of long and short-term factors are combining to drive a need for new business models for the design and construction industry. The future of project delivery is rapidly evolving from traditional design/build and design/bid/build delivery systems, to an integrated approach that requires architects, contractors, owners, and all stakeholders in the enterprise take on new roles and competencies.

McGraw-Hill Construction and The American Institute of Architects, California Council (AIACC) are working together to define the issue and respond to this changing environment.
