Questions? Call the event registration office at (866) 727-3820, or email Cristina Hoepker at cristina_hoepker@mcgraw-hill.com

Your business in 2008: Megatrends that matter

You Are Cordially Invited...

Engineering News-Record invites you to join other senior-level industry executives on **October 23-24, 2007**, and gain insight into some of the industry's priorities for the year ahead. Sessions will feature owners speaking out about the "triple bottom line." Projects that make money, but also are sustainable and show social conscience.

JUST ADDED! Post-ENR Forum Autodesk Conference Workshop:

Evolving Technology in the Building Industry = Strong Return on Investment.
The building industry has evolved significantly in recent years as more designers and building teams are using online collaboration. The industry is continuing to move further from a paper-based model and into an online, on-demand working environment, as they collaborate across countries and time. Leading builders are already using on-demand collaborative project management software to automate complex bidding processes and manage all their moving parts. By looking to new technology to help update traditional building practices, these companies have moved beyond the single office building and are now interacting with global teams through a collaborative workflow environment that can be scaled to accommodate teams of any size in any region. Everything is now online and on-demand so global teams can access what they need whenever, and wherever, they need it. Come meet with an industry expert who will explain the solutions that builders are leveraging to achieve strong return-on-investment figures through the discussion of case studies and real-life examples and challenges. Learn how to stay ahead of the curve as new technologies are introduced into building projects.

Special Registration Opportunity

The ENR Construction Business Forum is being held one day prior to the Outlook 2008 Executive Conference, where you can get a first-hand view of the trends that will be affecting the construction industry in 2008. For more information, go to <http://www.construction.com/event/>
